## Drinking Water Treatment Plant especially designed for TSS, O&G & Bacteria removal

**PANIO GENRE** is a new generation Ceramic membrane process with proven performance. A compact and portable water dispenser which can treat Water from any surface source like ponds, lakes, canals and streams and make it safe to drink. It can even take in flood water.

**PANIO GENRE** treats water through a combination of Micro Filtration and Ultra filtration to remove Particulates, VOC, TSS, VSS, Turbidity, Oil, Metals, Organics and water borne pathogens (Bacteria, Viruses, Protozoa etc.) which causes diseases like diarrhea, dysentery, cholera and hepatitis.

# Applications of PANIO Genre

- 1 Rural Settlements**  
In places where there is mineral contamination in the ground water.
- 2 Settlements of Urban needy**  
Where piped water is not available and deep bore well is not allowed.
- 3 Disaster Management**  
When potable water supply is the biggest challenge.
- 4 Hilly terrain**  
Where bore well and even shallow pumps are not feasible.
- 5 Institutions**  
Remotely located schools, colleges and other institutions.
- 6 Temporary Settlements**  
Army or police camps and barracks.
- 7 Private Corporates**  
As part of their CSR initiative in their impact zone.

## Unique Features

Fourth Generation filtration system with Ceramic Membranes - the best suited for surface water treatment.

Completely Automated.

Very small footprint can be ported to any location.

Minimal wastage of input water.

Constructed from best in class components.

Designed for a life of at least 10 years.

The cost of treated water is minimum.

Requires very little electricity and can be inverter operated also.

Minimal spares consumption.
